EURACT Autumn Council Meeting & more ...

Thursday 7th of October, we held our EURACT's Autumn Council meeting, again online. The Council Report is available at [our website](#) and shows how (inter)active we were. We gave information in plenary meetings and discussed future project in our committees and task groups.

Vesna Homar reported on the successful **30th Janko Kersnik EURACT Bled Course!** Participants, both live and online, were intensively immersed in the theme of "Leadership in Family Medicine". Besides, we celebrated the 30th edition and, traditionally, inspected our EURACT vineyard in Bled. We are happy to share developed teaching modules on leadership at [our EURACT website](#). On the [Bled course website](#) the key notes and a beautiful atmosphere video can be viewed.

In preview, we can announce that the **EURACT Bled Course 2022** will take place from 14 to 17th of September. Theme will be 'the Neo-Renaissance of Family Medicine'.

Wednesday 20th of October, we held our first **Snowball Symposium**. It was a successful, interactive, and international activity, dealing with the theme ‘How to be a good GP/FM teacher in the digital era?’. Next **Snowball Symposium** is planned for 24th of November: **Effective online medical teaching: mission impossible ... or not?**

Framework for Continuing Educational Development of Trainers in General Practice in Europe

On top of that, the **Leonardo EURACT course level 2 for trainers in GP/FM** is back! A full online edition will be held from 3rd to 5th of November.

Despite these planned online activities, we dare to plan again some live events. Vienna will be the first location where we will meet again in real life. All Council Members are invited for a 2-day meeting. Also, the **EURACT Medical Education Conference** is back on our planning. Date and location will be announced soon!

EURACT wants to be there for its members and for all GP/FM teachers. Please have a look at our website for **materials, information, guidelines, etc.** Also remember the **case-based CME program for GPs on the management of COVID-19**. The cases, presented with feedback from peers, from experts, and from evidence can be consulted at the platform of Mirrors of Medicine or you can register to receive them bi-weekly in your mailbox. It is very easy to access and for free! Visit the [PinPoint platform](#) and register yourself.

This CME program is developed in collaboration with WONCA Europe and ISSECAM. Soon there will be a second program on Osteo-arthritis & pain.
