

'The ABC of family medicine research' – a trans-national training course for Ukrainian early career family doctors

Pavlo Kolesnyk (Ukraine) , Michael Harris (UK)

- How much teaching about FM research methodology is there in your country?
- It's new for Ukraine: we piloted a 2-day international training course ('A') with 15 early career FDs in Kiev
 - co-chaired and taught by PK & MH
 - PK: ensured that the teaching was relevant to Ukrainian FDs
 - MH: gave an international perspective
- *How effective was it?*
- Evaluation by validated pre- and post-course questionnaires
- **Results:**
 - the trans-national model of research courses for FDs is effective and feasible
 - strengthened closer working relationships between two European countries
