

Alice (family medicine) not in Wonderland

- Specialization with real specialist training cannot be developed, real undergraduate and specialist teaching. according to EURACT Statements and style, cannot be developed
- but instead they are contrasted and their supporters are put in danger in different and bad ways !
- All this happens WHEN
- the " medical education " is "managed" by medical councils or by little societies
- using their " power "
- to organise little courses on specific themes of interest, calling for " teaching " friends of friends,
- that are often the same persons in the same positions in syndicates / medical trusts and ...
- they pay !! friends of friends just to " organise events " also as ...cocktail events ! ...political shadows in specific political times and contexts
- so creating closed circles, eliminating every opposition
- ...Of course EURACT and LdV Courses and academic grow for Family Medicine are strongly obstructed or stopped, EURACT members are demotivated and frustrated
- Young new doctors are angry for this , but without real power.
- What to do in this situation ...?
- ...
- Not by Lewis Carroll, but really by Francesco Carelli
